CAMPBELL

CAMPBELL HEAT RECLAIM DE-SUPERHEATERS FOR LARGE CAPACITY REFRIGERATION AND AIR CONDITIONING SYSTEMS.

MODEL CDSH-4/2-15

DESCRIPTION.

The **CAMPBELL** "CDSH" series mechanically cleanable de-superheaters designed for refrigeration or air conditioning plants with refrigerants R22, R134A and all blends and substitute refrigerants suitable for use with non ferrous materials. Designed for ease of installation, the "CDSH" de-superheaters are installed in the compressor discharge line. The proven counterflow design will not trap oil or liquid and will not allow entrained oil to flow back to the compressor on the off cycle.

MAINTENANCE.

Water tubes can be mechanically brushed clean as the water end plates and return bends are removable.

SPECIFICATIONS.

Refrigerant shell	316 stainless steel.
Water tubes model CDSH	Extended surface copper.
Water tubes model CDSH-CN	Extended surface 90/10 cupro nickel.
Tube plates	316 stainless steel.
Removable end plates	316 stainless steel.
