APPLICATION BULLETIN : HAN-L5(B)/PCB-058V2. SUBJECT : IRM-20 – REMOTE INFRA RED RECEIVER.

EXTENDED REMOTE INFRA RED CONTROL WITH IRM-20 ACCESSORY.

All HAN-L5 and HAN-L5B microprocessor controllers are fitted with an infra red receiver to allow remote control using the "IR-RC" infra red commander unit for armchair control. The use of the IRM-20 remote receiver module enables the HAN-L5 to be switched from another area by using the "IR-RC" commander unit.

The IRM-20 simply plugs on to the HAN-L5 wall control and is supplied with a small wall enclosure which contains an infra red receiver and green LED to indicate air conditioning system is on.

Order code for the kit is: IRC/S-20.
